

7 years' global cooling

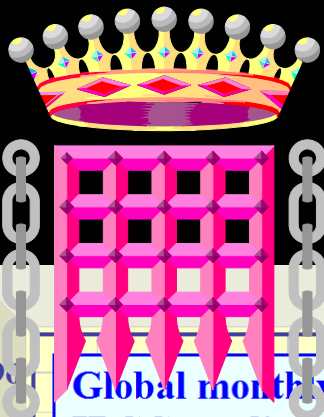

www.scienceandpublicpolicy.org

Global monthly temperature anomalies, January 2002 to January 2009

IPCC predicts warming at +2.4, +3, +3.9, +4.7, +5.3 C/century

The observed cooling trend is equivalent to 2 C/century

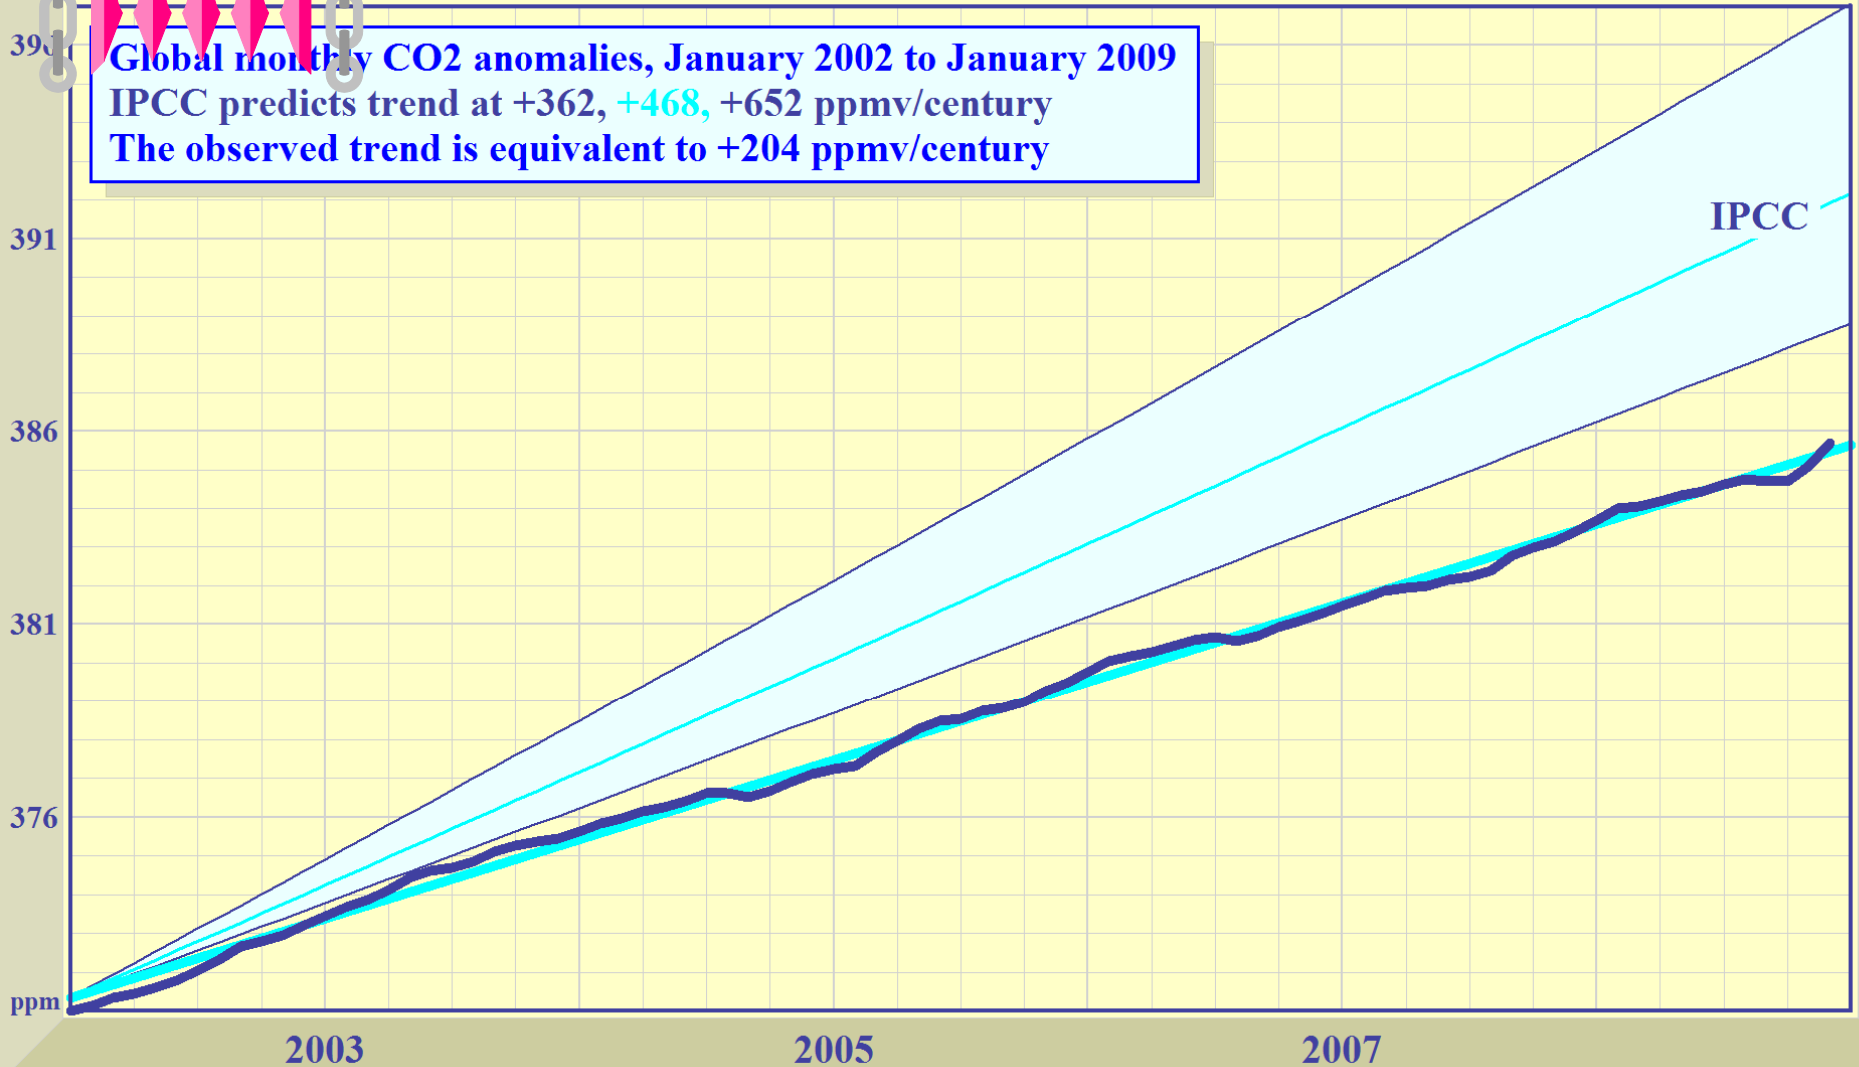

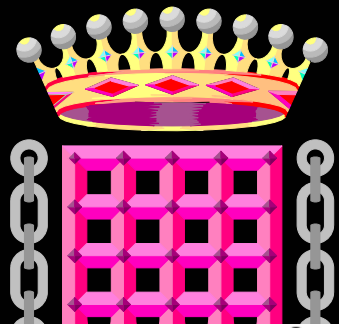

CO2 is rising in a straight line

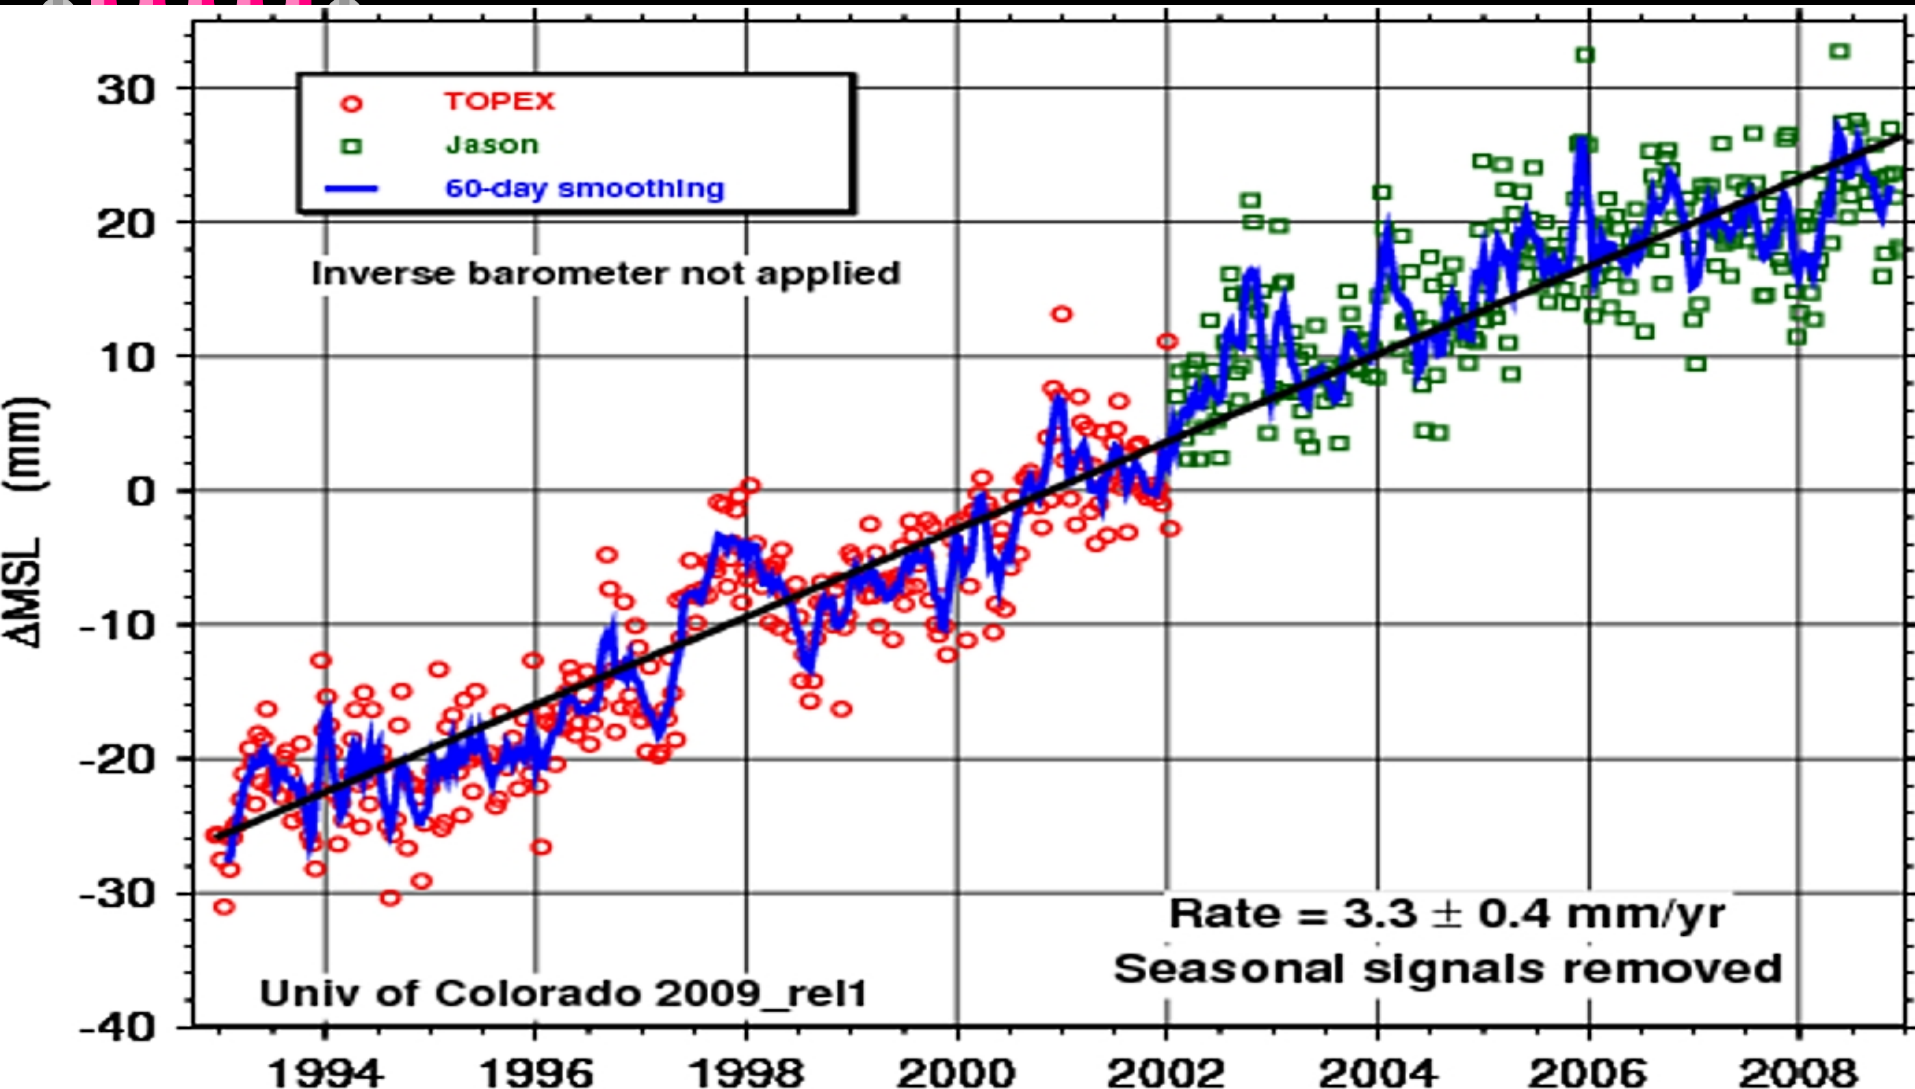

www.scienceandpublicpolicy.org

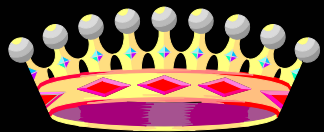

Global monthly CO2 anomalies, January 2002 to January 2009
IPCC predicts trend at +362, +468, +652 ppmv/century
The observed trend is equivalent to +204 ppmv/century

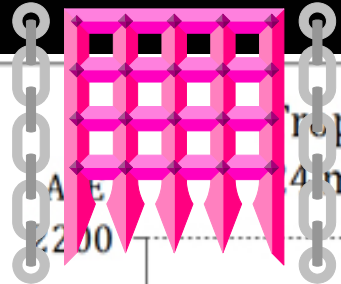

Sea level rise is just fine

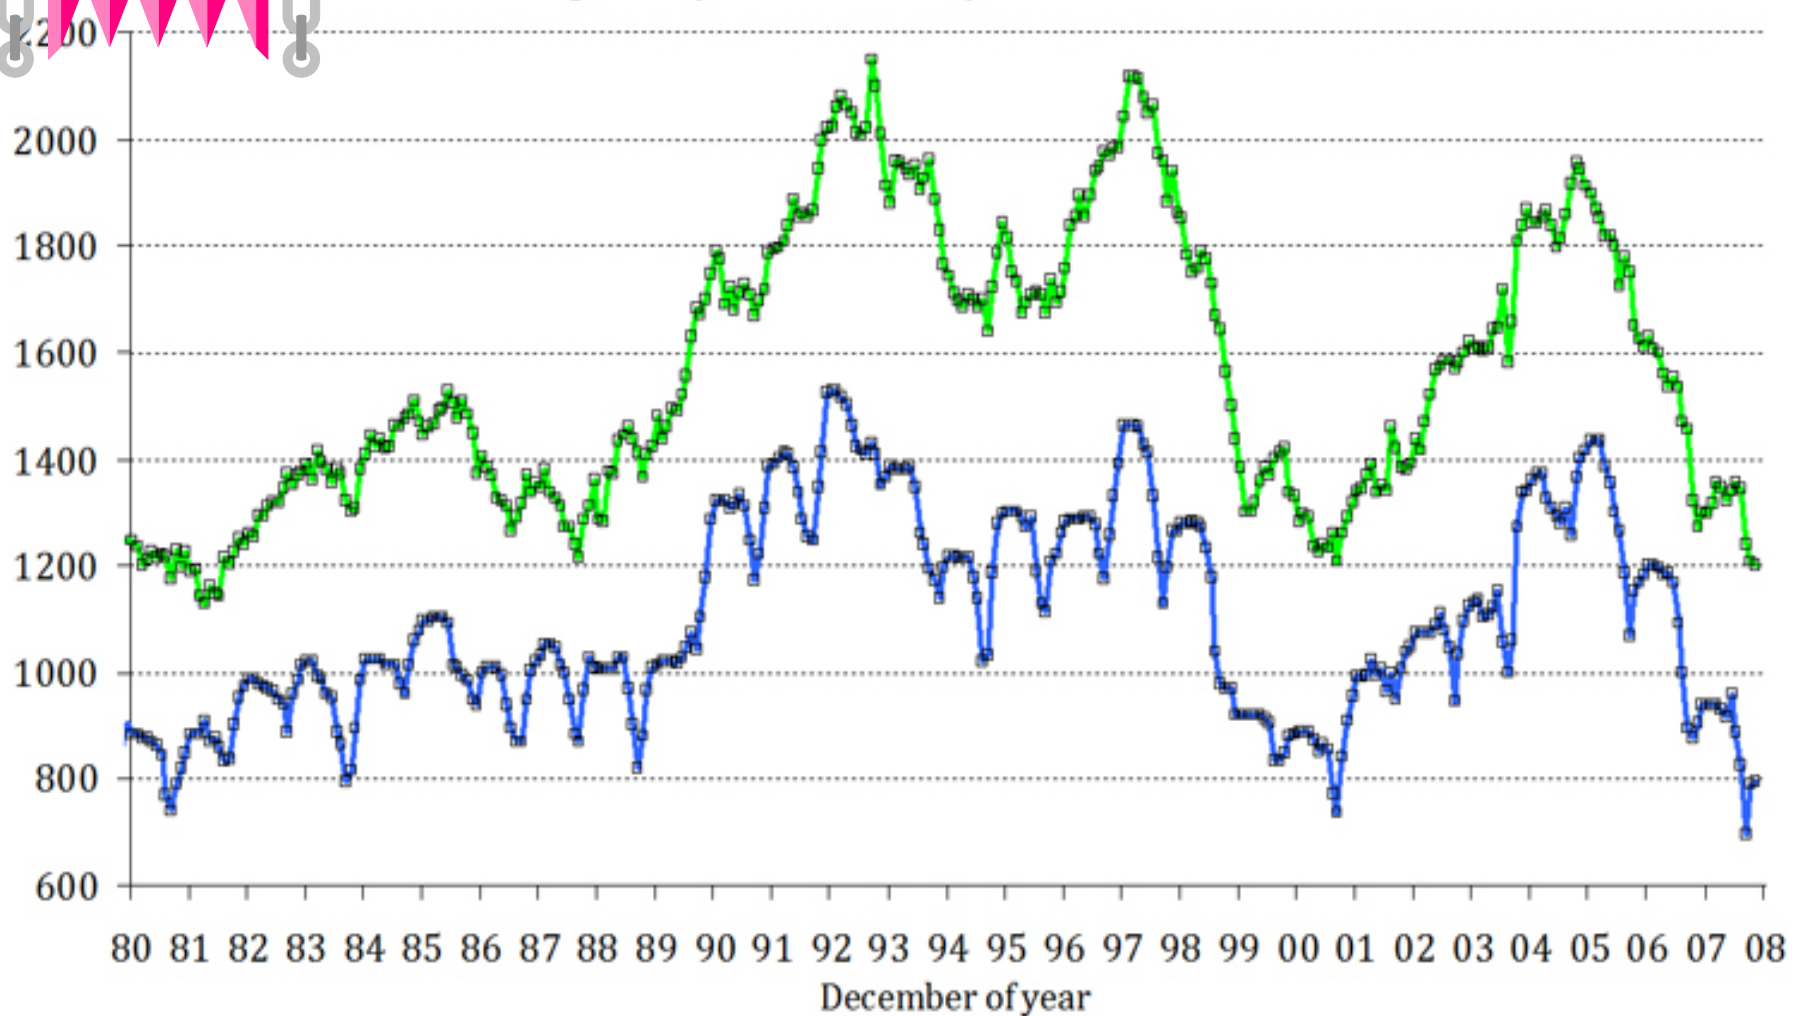

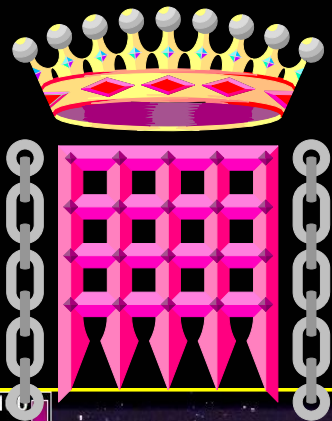

Hurricane activity is just fine

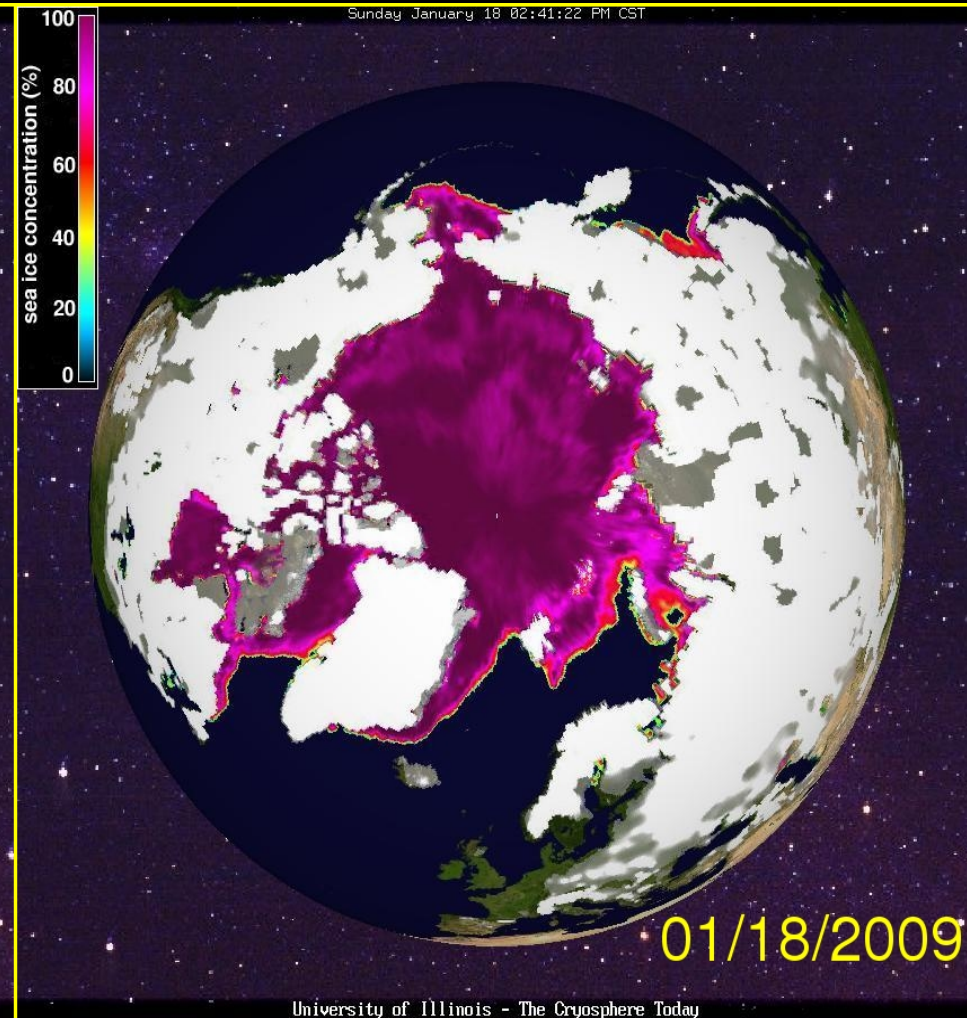

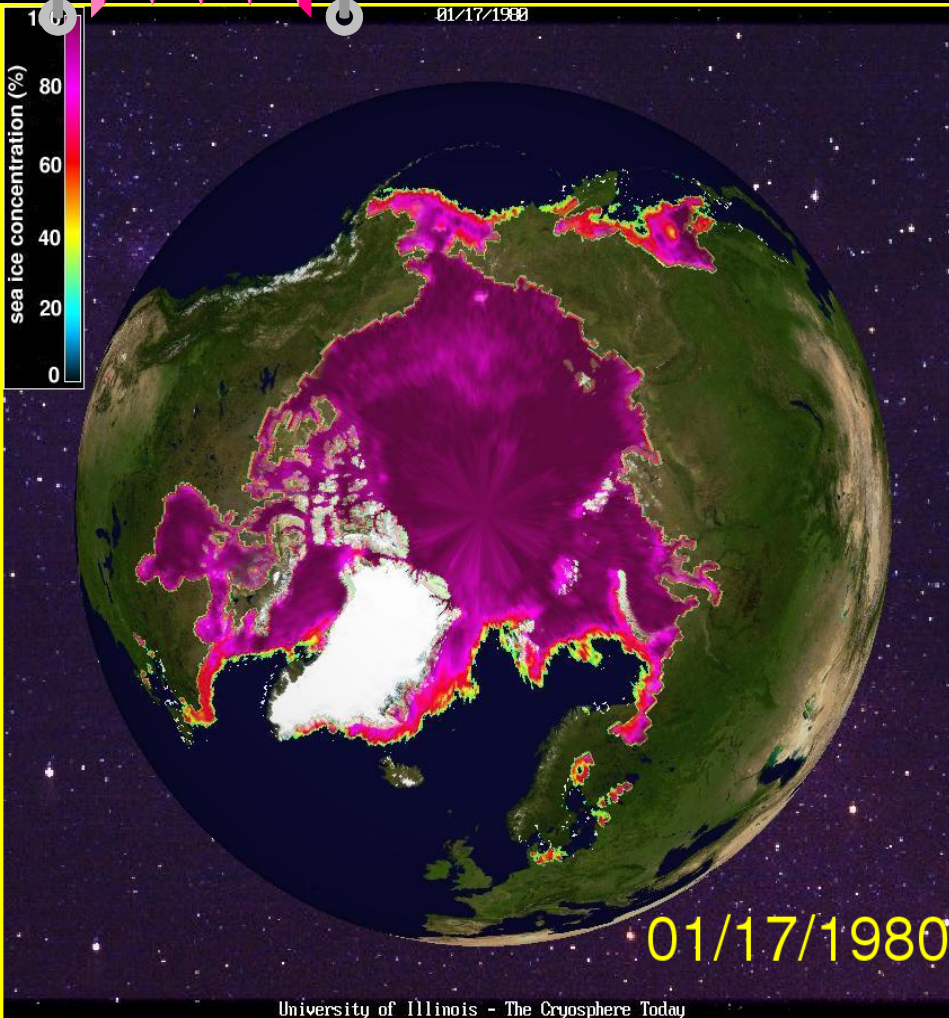

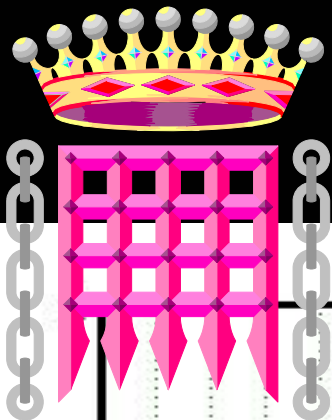

Tropical Cyclone ACE 1980-2008
4 month Running Sum (Global and NH)

Arctic sea ice is just fine

Antarctic sea ice is just fine
